

7th Global Tape Forum
Global Test Methods Committee
&
Int. Technical Conference 2020
41st Adhesive Technical Seminar

Osaka International
Convention Center

17_(Tue.)-19_(Thu.) November. 2020

Hosted by **JATMA**

The Japan Adhesive Tape Manufacturers Association (JATMA) will hold the “Global Tape Forum (GTF) 2020” at Osaka International Convention Center from 17 to 19 November 2020.

The GTF is a technical conference consisting of five adhesive tape industry associations- PSTC in North America, Afera in Europe, CATIA in China, TAAT in Taiwan, and JATMA in Japan-. The first GTF was held in Orlando, USA in 2009. After that, the five associations take turn holding the GTF about every two years. The GTF 2020 will be the 7th forum, and one which will be held in Japan for the first time.

Adhesive tapes are easy-to-use and multifunctional so that they have come to be used for various purposes in many occasions: for home and office use, in the process of producing automobiles and electronic parts and in the medical field. I am sure that with the development of new technologies and new functions, the adhesive tape market will expand further for years to come.

I think that the Global Tape Forum 2020 will give you a great business chance because many associations and corporations in the adhesive tape industry are supposed to get together from all over the world to vigorously discuss cutting-edge technologies and the latest adhesive market trend. I would like to see many people engaged in the adhesive tape business and make fruitful and useful discussions with you in the forum.

Chairman of the Japan Adhesive Tape Manufacturers Association (JATMA)

Ikusuke Shimizu, Managing executive officer of SEKISUI CHEMICAL CO., LTD.

Program
